Sprint Backlog 3

Period: 2/22/2023 - 3/01/2023

Product Owner: Osaze Imohe

Sprint Items:

      1.1.   Osaze: Writing code for Sign in Screen UI

      1.2.   Axel: Designing Dark mode for application

      1.3.   Aadhya: Designing Light mode for application

      1.4.   Owen: Writing code for to-do list UI

      1.5.   Temujin: Writing code for Grade Calculator UI

      1.6.   Shannon: Designing frog

Sprint Planning:

The goal of the sprint is to have the whole User Interface of the application coded out. By the end of the sprint we hope to have the Login-Screen, To-do Lists screen, and Grade calculator coded out. Even though it is without functionality. These UI components are to be guided by the designs by Aadhya and Axel. Hopefully, by the end of this sprint we will have most of the User Interface done so we can work on functionality

Spring Review:

We had a meeting to discuss the features that we all had in mind to be implemented so we were on the same page about our tasks. The goal for the designs and User Interface were achieved. The frog was also designed.

We decided that in order to improve efficiency we needed to be more specific about the tasks being assigned in the next sprint.

Unfinished Items

- Screen interfaces
- Sign Up screen User Interface
- Grade calculator Implementation
- Firebase Database Implementation
- Login Implementation using Firebase
- Sign-Up Implementation using Firebase
